

CO-DRIVER TRAINING

THE GENIUS ON THE RIGHT

Have you heard about the theory of relativity? You must have heard about Albert Einstein! The co-driver (or rally navigator) is the genius who must control TIME and SPACE, as well as MOVEMENT to ensure that the drive leads to a victory.

MARC MARTÍ was born in Barcelona 51 years ago. Beginning in 1984 and over the past 34 years, he has occupied the position of co-driver.

He is the teammate of one of the best Spanish drivers in the world. On the occasion of his first visit to Quebec to race in the *Rallye Auto international de la Baie-des-Chaleurs*, we, along with the NACAM Championship, are offering all co-drivers an opportunity to follow a training course to learn more about the responsibilities of the genius seated to the right of the driver, THE CO-DRIVER.

COURSE AGENDA AND DESCRIPTION

1. Co-driver responsibilities
 - Basic concepts (itinerary, stages, sectors, reagrouping, etc.)
 - Road book
 - Time control
2. Preparing for a rally with Marc Martí
3. Notes: how to prepare and read notes
4. Note system tutorial
